## SUMMARY

Data Analyst with experience in building end-to-end data solutions using Python and SQL, including machine learning models and dashboards. Skilled in analyze large datasets and delivering actionable business insights.

## EXPERIENCE

### Data Science Intern – AB Technologies

Feb 2023 – Mar 2023      Nagercoil, India

- Processed and analyzed 100K+ records using Python and SQL, improving data quality through cleaning and preprocessing.
- Built end-to-end data pipelines and optimized data processing workflows for structured datasets.
- Developed and optimized machine learning and deep learning models using scikit-learn and TensorFlow, improving predictive performance by 50%+.
- Applied statistical analysis and machine learning techniques to support KPI reporting and business insights generation.
- Developed interactive dashboards using Tableau and Power BI for data visualization and decision-making.

### Research Assistant (AI & Data Science) – University of Koblenz

Oct 2025 – Present      Koblenz, Germany

- Developed and evaluated machine learning and deep learning models (Random Forest, XGBoost, Neural Networks) for classification and time-series forecasting, measured using ROC-AUC and RMSE.
- Processed and analyzed structured datasets using Python and PySpark, enabling scalable data workflows for large datasets.
- Applied feature engineering, hyperparameter tuning, and model validation techniques to improve predictive performance and robustness.
- Compared multiple models and optimized performance using statistical evaluation metrics.

## PROJECTS

### Bayut (UAE) Real Estate Market Intelligence Dashboard

- Processed 41K+ real estate records using SQL and Python, removing 60% missing data and engineering pricing features.
- Built Tableau dashboard analyzing AED 156B+ sales data to identify pricing trends and KPI insights.

### Real Estate Valuation & Overpricing Detection

- Developed machine learning models (XGBoost, LightGBM) for predicting price and overpricing detection, engineering 200+ features, evaluating performance using TimeSeriesSplit (MAE ~189K).
- Built prediction intervals (P10–P90) with 99.78% coverage to enable uncertainty-aware pricing analysis.

## EDUCATION

### Masters in Web and Data Science

Universität Koblenz | CGPA: 2.1

Oct 2024 – Present

### B.E. Computer Science & Engineering

Anna University | CGPA: 1.7

Aug 2019 – Jul 2023

## CERTIFICATIONS

- Google Data Analytics (Coursera)
- Deep Learning Specialization (DeepLearning.AI)
- Machine Learning with Python (Udemy)
- Data Science (Udemy)

## LANGUAGES

English: C1 (Advanced)

German: A1 (Beginner)

## SKILLS

|                           |                       |         |
|---------------------------|-----------------------|---------|
| Python                    | SQL                   | MongoDB |
| Data Analysis             | Statistical Analysis  |         |
| Exploratory Data Analysis |                       |         |
| Pandas                    | Hypothesis Testing    |         |
| Tableau                   | Power BI              | Excel   |
| NumPy                     | Machine Learning      |         |
| Scikit-learn              | Deep Learning         |         |
| TensorFlow                | PySpark               | AWS     |
| Data Science              | Business Intelligence |         |

## ACHIEVEMENTS

- Academic Excellence Award (3x), graduated with distinction (CGPA 9.0/10)
- Winner and finalist in inter college and national-level technical competitions
